Professional Experience

Graduate Engineer Trainee
Go Digit Insurance

07/2024 – present | Bhubaneswar, India

Working as a backend developer in the travel team, focusing on building and maintaining systems using Java, Core Java, Spring Boot, and PostgreSQL. collaborate with teams like cloud, database, and batch processing to ensure smooth operations. My role supports policy handling, claim processing, and system optimization for reliable insurance services.

SDE Intern
Spikewell limited

10/2023 – 05/2024 | Bhubanwswar, India

primarily work on Android development, focusing on vehicle tracking and navigation features using Google Maps API. responsibilities include building and maintaining real-time tracking systems, optimizing location accuracy, and enhancing user experience

Projects

PathFInder
springboot,react

This project is a practical implementation of **Dijkstra's Algorithm** designed to compute the **shortest path between two points** on a dynamic map. Users can **add multiple nodes (points)** to the map and define connections (edges) between them with specific distances or weights.

AgileFlow: Team Task & Issue Tracker
React,node,express,expo,mongodb,antdesign,tailwind

AgileFlow is a full-featured **Jira-like** project and issue tracking system designed for agile software teams. It offers seamless collaboration and organization of work across both **web** and **mobile** platforms. The system supports team formation, task scheduling, real-time collaboration, and tracking of issues through various stages of development.

DonateRN
expo,supabase,postgres

mobile application designed to streamline and encourage **various forms of donations**—ranging from **blood**, **clothes**, and **food** to **monetary contributions**. The goal is to provide a centralized and accessible platform for people who want to give and for organizations or individuals in need.
